

# Threagile

Agile Threat Modeling

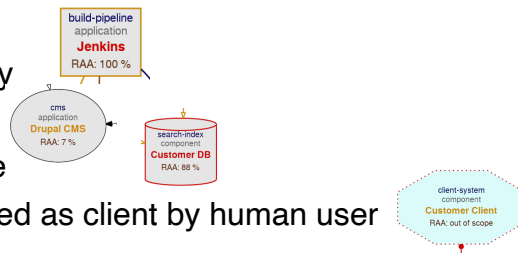

---

## Diagram Style Legend:

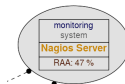

### Shape Type Examples:

- shape type box = external entity
- shape type ellipse = process
- shape type cylinder = datastore
- shape type octagon = asset used as client by human user

### Shape Fill Color Examples:

- light blue = asset on the internet
- light gray = container
- gray = virtual
- dark gray = physical
- boxed compartments inside shape = multi-tenant asset
- pink (dotted) = asset without any data (model misses data)

### Shape Label Color Examples:

- red = asset with mission-critical data regarding integrity
- amber = asset with critical data regarding integrity

PostgreSQL Database

Apache Webserver

### Shape Border Color Examples:

- red = asset with strictly-confidential data
- amber = asset with confidential data

### Shape Border Style Examples:

- triple-lined = redundant system
- dotted = out-of-scope asset

### Arrow Label Color Examples:

- red = connection transfers mission-critical data regarding integrity
- amber = connection transfers critical data regarding integrity

Deployment  
ssh (/VPN)

Web Application Traffic  
http

### Arrow Line Color Examples:

- dark blue = connection over VPN
- brown = connection with IP filter
- red = connection transfers strictly-confidential data
- amber = connection transfers confidential data
- pink (dotted) = connection transfers no data (model misses data)

### Arrow Line Style Examples:

- dashed = maintenance access (i.e. non-business)

### Arrow Head/Tail Style Examples:

- empty (i.e. not filled) = read-only connection
- arrow tail also styled = bi-directional connection
